

## Elections, Publications, Events and More!

Hello again INHWE Members! In this week's newsletter, I wanted to highlight some of the activities and achievements taking place within our network. This is something I've always wanted to do because we often receive emails or social media mentions about the fantastic work of our members. However, until we started our weekly newsletter, there wasn't an opportunity to spread the news. But now, we have the platform to do so.

We'd like to begin by congratulating **Marius Ungureanu** (Babeş-Bolyai University, Romania), who has been elected as the new [EUPHA-HWR](#) section President. Congratulations, Marius! We'd also like to extend our appreciation to the outgoing president and fellow network member, **Ellen Kuhlman**, for her fantastic work over the last few years. **Anthony Breitbach** (Saint Louis University, USA) has recently published the chapter "[Governance of Interprofessional Education and Collaborative Practice](#)" as part of the Springer textbook "Novel Health Interprofessional Education and Collaborative Practice Program: Strategy and Implementation." This is an extremely interesting topic for our membership and we're pleased to note that Anthony has kindly acknowledged INHWE as a key IPECP organisation. Additionally, we congratulate **Alison H. James** (Cardiff University, UK) for publishing multiple chapters in the third edition of "[Clinical Leadership in Nursing and Healthcare](#)".

Our colleagues at **AoME** are hosting a free event as part of their AoME Insights series on the topic of "[How to Implement Reflective Practice for Health Professions Educators](#)". The event will take place from 10:00 to 16:00 on Wednesday 6<sup>th</sup> December 2023 in Manchester (United Kingdom). Lastly, **Martin Morandell** (Health University of Applied Sciences Tyrol, Austria) is seeking assistance from within our network. He's looking for individuals with experience in 'smart environments' and 'Ambient Assisted Living'. Martin aims to implement new systems within his University and would like to connect with any smart care or smart living lab closely associated with a healthcare education and involved in teaching/training of students.

If you have any news from your professional life to share or questions for those mentioned above, please don't hesitate to reach out via the button below. We'd love to hear from you!
