## EU Health Policy Platform

---

INHWE will be attending a meeting of the EU Health Policy Platform (EU HPP) in October and we would love to represent our members views at this important meeting. The one-hour meeting, run by the EU HPP Stakeholder Network on Profiling and Training the Health Workforce of the Future, will focus on the implementation of one of the key Calls to Actions to “Develop a strategy for a thorough and systematic reskilling and upskilling of the EU health workforce”, with a particular focus on the [BeWell Skills Strategy](#). If you would like INHWE to contribute something on your behalf then please let us know via the contact button below.

[Contact Us](#)

Members of the EU HPP network are asked to submit their expertise and input as an essential component in shaping and executing initiatives that positively impact the European health and care landscape. This meeting presents an ideal platform for members to collaboratively delve into the finer details of the strategy, explore innovative ideas, and align our efforts to ensure its success. The meeting organizers believe that together, we can make a significant difference in advancing the state of healthcare across Europe.
