

International Network for
Health Workforce Education

Newsletter

Dublin 2026 Starts Today

A very warm welcome to Dublin and to the 6th International Congress of Health Education and Research. We are delighted to bring together colleagues from across the world to share ideas, experiences and new perspectives around our theme: "Innovating Together - the Future of IPE." At the heart of INHWE is the belief that better health workforce education is built through collaboration across professions, disciplines, organisations, countries and stakeholder groups. We are proud to be an open and welcoming network where everyone has something to contribute and where conversations that started over a presentation, workshop or coffee can grow into lasting international connections, collaborations and friendships.

Dublin is also an opportunity to look ahead to an exciting year for our growing community, which will mark the 10 year anniversary of INHWE. Through the VIPE Academy Project, we will continue creating opportunities for educators and students to take part in interprofessional learning and connect across geographical and professional boundaries. We also look forward to bringing our community together again for our annual Online Conference in January 2027, before joining colleagues from around the world in Nicosia, Cyprus for All Together Better Health XII in June 2027. We hope the ideas, conversations and connections made here in Dublin will continue long after the Congress ends, and that you will remain an active part of the INHWE community throughout the exciting years ahead.

David Smith
Director
