

Revolutionizing Nursing Professional Development

Hello again INHWE Members! You may remember that last year we mentioned our partnership with the [Evidence-Based Nursing blog](#) to run a series of articles with our members from across the globe. Well, I am delighted to say another of these blogs, 'Revolutionizing Nursing Professional Development: Unveiling the Power of Generative AI, ALM, and Machine Learning', produced by **Jennifer Shepherd** (Director, Nursing Education and Project Management and Interim Innovation Strategist at ANA Enterprise), is now live!

In the fast-paced world of healthcare, nursing professional development (NPD) specialists and educators play a crucial role. They are responsible for preparing nurses to meet the changing demands of patient care, regulatory standards, and technological advancements. As the healthcare landscape becomes more complex, innovative technologies such as Generative AI, Advanced Language Models (ALM), and Machine Learning (ML) can revolutionize nursing professional development, improving education, practice, and outcomes.
