VIPE Academy Project

Hello again INHWE Members! We have some exciting news, starting in November 2025, the **VIPE Academy** project, funded by the **Erasmus+ programme**, will run for two years with the goal of supporting educators of healthcare students in developing the skills and resources needed to facilitate **virtual interprofessional education (VIPE)**. The project seeks to strengthen collaboration across professional and geographical boundaries by creating accessible and inclusive learning environments. The VIPE Academy will develop a resource toolkit and deliver four virtual IPE sessions involving students and educators from across Europe and beyond. Using case studies and scenario-based learning, the project will promote and enhance educators' capacity to design and deliver effective virtual IPE. The outcomes will include a toolkit, facilitator training programme, and a network of educators prepared to deliver high-quality, inclusive online interprofessional learning opportunities.
