

Dublin 2026: Programme and Social Events

Hello again INHWE Members! The **Dublin 2026 programme** is almost final and presents a rich 2 days centred on the theme **Innovating Together – the Future of IPE**. The programme creates a strong sense of connection, collaboration and shared purpose, with recurring themes including digital transformation and AI, simulation and virtual learning, workforce development, leadership, patient-centred care, IPE, continuing professional development and the translation of educational research into practice. Alongside traditional presentations, posters and workshops, the introduction of interactive **Agora sessions** gives the event a dynamic feel encouraging dialogue, reflection and exchange rather than simply presentation. The programme also connects strongly with wider international developments, including the ECHOES Project and the journey from Dublin towards **ATBH XII in Cyprus in 2027**. Our social events in add an important opportunity for informal networking, relationship-building and shared cultural experience. Full programme details can be found below:
