Virtual Interprofessional Education (VIPE) Erasmus+ Project Proposal

Hello again INHWE Members! We would very much appreciate your help with a short (less than 2 minutes) survey as part of our Virtual Interprofessional Education (VIPE) project proposal for an Erasmus+ grant. The survey aims to gather insights from health education professionals with an interest in interprofessional education, specifically in virtual settings. If successful, the results of this survey will help shape future strategies for delivering impactful IPE experiences to diverse student groups and healthcare professionals globally.
