New IPE Network for Southern Europe

Hello again INHWE Members! The **Southern European Interprofessional Education Network** (SE-IPEN) is a new (and free) community of practice dedicated to advancing IPE within Southern Europe by bringing together educators, healthcare practitioners, and researchers from countries such as Greece, Italy, Spain, Malta, Portugal, Cyprus and others. **SE-IPEN focuses on building collaborative partnerships tailored to the region's unique cultural, educational, and healthcare contexts**, fostering solutions that span linguistic diversity, workforce mobility, and system differences. Its mission includes promoting culturally relevant innovations in IPE, enhancing cross-border educational initiatives, and elevating Southern Europe's contributions to the global IPE landscape. The SE-IPEN initiative is proudly supported by INHWE and we are delighted to be offering secretarial and administrative support to get this new network off the ground.
