

## New Membership Dashboard

Hello again INHWE Members! Some of you may recall that in recent months, we've been working behind the scenes to make our membership services more accessible and user-friendly. We greatly value your feedback, and based on your suggestions, we have taken significant steps to simplify the membership process. In response to the feedback that multiple login and passwords were burdensome, **we have completely removed the login section from our website**. Instead, we have created a more informal membership style, making it easier for everyone to engage with our network. New members now only need to sign up for our newsletter to enjoy all the same membership benefits as before, without the hassle of extra passwords. **To support this change, we are delighted to introduce our brand new [Membership Dashboard](#)** – a one-stop-shop where you can access everything you need to know about the latest developments within our network. You can find back issues of our weekly newsletters, a comprehensive list of upcoming online 'INHWE Meets', as well as announcements about in-person events (offered either free or at a reduced fee for members).

This shift from a login-based membership system to a more open and informal network will not alter the range of services we offer to you, our members. In fact, it has only increased our determination to create an inclusive network that caters to everyone's needs in various different ways. We remain dedicated to running all our membership services while making even greater efforts to foster connections among our members, both in-person and online. For example, we were delighted to welcome over 20 members to the final conference of [VRHealthLeaders](#) project in Athens, Greece. We also offered our members a reduced entrance fee to our first [in person conference](#) since the pandemic which took place in Cardiff, United Kingdom. We've also restarted our informal INHWE Meets activities and will soon be restarting our podcast too! We are genuinely thrilled about this streamlined registration process and we believe it will encourage more colleagues to join our interprofessional, multistakeholder community. For more information on all these exciting developments and more, simply click the button below!
